You are studying the 1869 array of automobiles and deciding on the car you will drive this season. The above cars represent the very highest type of American motor car construction. THE VERY BEST CARS FOR SALT LAKE CITY SERVICE, AND WE CAN PROVE IT. IF YOU ARE NOT QUITE CONVINCED. GET A DEMONSTRATION. No further argument will be necessary.

Tom Botterill Automobile Co.

62-64 West Third South.

development work has not yet been done to class them as mines. The Prince Consolidated is a fine mine with tremendous bodies of ore in which there is no zinc. Some of the principal mines, however. carry ores in which zinc is a prominent factor and the problem of separating the zinc from the lead is, in my judgment, one that will have to be solved before they can be depended upon to give the results their magnitude suggests they ought to give."

This statement is in brief what Captain

This statement is in brief what Captain Duncan MacVichie, the widely known mining engineer and expert, thinks of the Pioche, Nev., district, or at least that portion of it immediately surrounding the camp. It does not apply to the contiguous Bristol and Jackrabbit districts, because the captain did not have time to visit them during the few days' time at his disposal on the trip that he has been making through the southern portion of the Sagebrush state. He will likely return to that region by and by and continue his investigations into the districts mentioned, as he considers the ccuntry a most intended.

concentration and cyanide processes employed are effecting a splendid saving of the values. The mill product is converted into bullion, so there is nothing to ship to smelters."

to smelters."

At Rhyolite, in the Bullfrog district, Captain MacVichie found much to interest him and, while he does not pretend to be much of an enthusiast on gold mining under any conditions, he says the camp is going to make a good record. In fact, he says there are some things in the district that he would not mind taking a crack at himself, notwithstanding his aversion to gold mining on gentaking a crack at himself, notwithstanding his aversion to gold mining on general principles. The Bullfrog Pioneer company, he says, is shipping ore from an eight-foot ledge that goes \$200 to \$300 to the ton without sorting and the property looks good to him. The Montgomery-Shoshone also looks good and he believes, now that the "wildcatting" days of the region are practically at an end, there will be lots of good, honest money made down there.

TINTIC OUTPUT OF ORE AND BULLION

Special to The Herald.) Eureka, Tintic, Jan. 15.—The ore and cultion production of the camp of Tintic made a good showing for the week ending last night. Seventy-six cars of ore of fifty tens each and eighty-nine cars of twenty tons each that went over the Knight railroad from the Knight syndicate mines represented the total output for the week. The Tintic Smelting company shipped 5.600 bars of bullion carrying lead, silver and gold, this amount making the total production of the plant since resumption, Dec. 1, 40,080 bars.

Ore receipts at the Tintic smelter:

MINING STOCK EXCHANGE.

Colorado Continues Upward Move and King Coalition Weakens.

Colorado is slowly but surely creeping up and, now that Sioux Consolidated is also being made a feature on the New York curb that stock, also, is expected to move to a stronger position soon. Iron Biossom holds strong without any apparent effort, while the heavy demand for Tinpic Central makes it look as though a manipulative move of some sort is incubating in that stock. Silver King Coalition is again in the hands of the bears. It sold down to \$4.15.

During the two regular and open board calls a total of 123,350 shares of stock, with a selling value of \$87,710.20, changed hands. Following is the list, of final quotations and record of sales made during the day: and King Coalition Weakens.

SALT LAKE-CALIFORNIA CO. GETS GOOD MONEY FOR ORE

W. Mont Ferry stated yesterday that the third shipment of copper ore from the Salt Lake-California company's property in Del Norte county, California, had just been settled for. The ore is shipped by water to the smelters at Tecoma, and Mr. Ferry says that the grade of the ore is such that, after paying all transportation and smelting charges, his company gets about \$29 a ton.

No particular effort has been made to take out ore, as yet, as the cumpany. No particular effort has been made to take out ore, as yet, as the cumpany, which is strictly a Salt Lake combination, has preferred to go ahead with development work. At the present time a cross-cut tunnel is being driven to tap two or three ledges at a depth approximating 30 feett, and this work will be accomplished during the next few months. In a contiguous property, also owned by the company, old workings have been unwatered to a depth of between 400 and 600 feet, and the same ledges carrying precisely the same character of high-grade ores as those which the company has been shipping have been found to exist, just as old reports stated they would be. This portion of the property shipped ores to Wales for treatment thirty or forty years ago. The ground will be made again proago. The ground will be made again productive by the Salt Lake company a ductive by the Salt Lake company as soon as the management gets around

LOST JOSEPHINE TO GET BUSY AGAIN

(Special to The Herald.)
Provo, Jan. 15.—The Lost Josephine Mining company has arranged to send a force of men to the mine to work all winter. The mine is located on the former Uintah Indian reservation, on Currant creek. It is a placer proposition, from which good returns have been made in gold, and which experts say will yet be one of the biggest gold propositions in the state. The locators and owners claim it is an old Spanish mine worked over a hundred years ago. There are abundant hundred years ago. There are above evidences of work having been de the property in the past, and from old maps and descriptions in the hands of the present company, they have no doubt that the mine is what they claim it is—

Metal Market.

Silver, 52%c per ounce. Copper (cathodes), 14 3-16c per pound. Lead, \$4.20 per 100 pounds.

SIMPLE REMEDY FOR LA GRIPPE.

Racking la grippe coughs that may develop into pneumonia over night are quickly cured by Foley's Honey and The sore and inflamed lungs are healed and strengthened, and a dangerous condition is quickly averted. Take only Foley's Honey and Tar in the yellow package, F. J. Hill Drug Co. Mining Notes.

Five carloads of ore from ""ah mines were released from the Taylor & Brunton sampler yesterday morning. Four cars of ore from Utah mines and two from Nevada were released from the Pioneer sampler yesterday.

George E. Gunn, head of the Gunn-Thompson company, is expected back from his several weeks' eastern trip either tomorrow or Monday. Colonel C. E. Loose was up from Provo yesterday looking after affairs connected with the numerous mining compan with he is prominently identified. According to letters that are beginning to pour in here from the east, New York curb operators must be making a lively play in the stocks of the Colorado and Sioux Consolidated companies already.

The Pluto Mining, Milling & Smelting company, incorporated under the laws of Illinois, has filed certificate with the secretary of state and can now do business in Utah. Isaac Jennings is designated as the local agent. The company has a capital of \$10,000.
